## EDGE PROFESSIONAL

Современные двигатели подвергаются невероятным нагрузкам, испытывая критические уровни давления и температуры. Поэтому сегодня к моторным маслам предъявляются самые жесткие требования. Для максимально эффективной работы двигателя в таких тяжелых условиях от моторного масла требуется особая устойчивость к температурным и механическим воздействиям. Масло должно сохранять свои свойства и непрерывно адаптироваться к режиму работы двигателя.

Благодаря инновационной технологии Fluid Strength Technology™ моторное масло Castrol EDGE Professional обладает исключительной прочностью масляной пленки. Ее уникальные свойства позволяют снизить потери на трение, в результате чего двигатель работает с максимальной эффективностью во всех режимах.

Уникальная система микрофльтрации, а также свечение в ультрафиолетовом диапазоне гарантируют эксклюзивность и качество продукта.

### Технология «усиленной масляной пленки» Fluid Strength Technology (FST)

Чтобы обеспечить максимальную эффективность работы двигателя в этих условиях, моторное масло должно обладать исключительной устойчивостью к температурным и механическим воздействиям. Необходимо обеспечить стабильность характеристик масла при любом режиме эксплуатации.

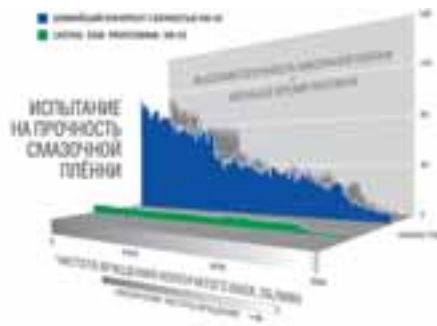

Именно поэтому Castrol разработал самую передовую гамму продуктов Castrol EDGE на основе уникальной технологии Fluid Strength Technology (FST).

FST — технология, активно «усиливающая» масляную пленку и позволяющая эффективно адаптироваться под любой режим работы двигателя. FST — это не просто отдельная присадка. Это патентованный комплекс решений, лежащий в основе наших самых современных моторных масел.

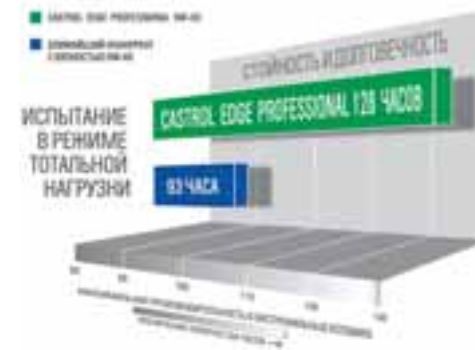

### Характеристики:

- \* Снижение интенсивности контакта между деталями двигателя — до 40%  
\* По сравнению с ближайшим конкурентом, на различных оборотах
- \* Увеличение времени работы двигателя на предельных оборотах до 35%  
\* Независимый тест по сравнению с ближайшим конкурентом

### Преимущества:

- \* Максимальная эффективность в любых условиях;
- \* Увеличенный ресурс двигателя даже в экстремальных условиях эксплуатации;
- \* Снижение потерь мощности в двигателе позволяет в полной мере реализовать его потенциал;
- \* Непревзойденный уровень защиты от износа в результате снижения трения.

### УФ свечение

- \* Характерно только для Castrol EDGE Professional
- \* Видимое отличие от других продуктов

## MAGNATEC PROFESSIONAL

Castrol Magnatec Professional произведено с использованием уникальной технологии Intelligent Molecules. Молекулы Castrol Magnatec Professional притягиваются к деталям двигателя и удерживаются на металлических поверхностях, значительно снижая\* износ. Уникальная система микрофильтрации и зелёный цвет масла гарантируют эксклюзивность и качество продукта.

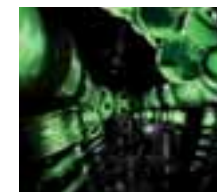

\* согласно отраслевому тесту на износ Sequence IVA

### Intelligent Molecules

Когда двигатель выключен, масло стекает в поддон картера, оставляя важнейшие детали двигателя незащищенными. Молекулы Castrol Magnatec подобно магниту притягиваются к деталям двигателя, образуя дополнительный защитный слой, активный с первой секунды пуска двигателя.

До 75% износа двигателя происходит во время его пуска и прогрева. Именно поэтому важно, чтобы двигатель Вашего автомобиля был особенно надежно защищен в этот период.

### Окраска масла в зеленый цвет

## ОХЛАЖДАЮЩИЕ ЖИДКОСТИ

### RADICOL SF

Концентрат высококачественной охлаждающей жидкости с увеличенными интервалами замены на основе этиленгликоля. В состав входит особый пакет присадок, не содержащий силикатов, нитритов, аминов, фосфатов и других неорганических ингибиторов. Обеспечивает длительную защиту против коррозии, кавитационной эрозии, отложений и гелевых образований во всех традиционных системах охлаждения бензиновых и дизельных двигателей, изготовленных из алюминия и /или чугуна, а также алюминия и /или медных сплавов.

### RADICOL NF

Концентрат охлаждающей жидкости на основе моноэтиленгликоля и специально подобранный пакет присадок, без ингибиторов, содержащих нитриты, амины и фосфаты. Создан с использованием гибридной технологии для современных двигателей легковых и грузовых автомобилей. Данную охлаждающую жидкость рекомендуется использовать в концентрациях от 33% до 50% с разбавлением дистиллированной водой, чтобы получить оптимальную защиту от коррозии. При этом температуры замерзания будут находиться в интервалах от -18°C до -36°C.

## ПРИСАДКИ К ТОПЛИВУ

### TBE

Комплексная присадка к бензину. Используется для улучшения смазывающих и моющих свойств бензина. Перед очередной заправкой автомобиля залить Castrol TBE в топливный бак в соотношении 1:1000.

#### Особые свойства:

- сгорает как и бензин, до нормальных выхлопных газов и безвредных окисей металлов;
- обеспечивает хорошую противокоррозионную защиту в бензобаке и топливной системе;
- предотвращает обледенения в системе подачи бензина;
- предотвращает отложения в топливной системе во всех местах, где присутствует топливовоздушная смесь (форсунки, карбюратор, впускные клапаны, впускной коллектор и камера сгорания);
- очищает систему подачи топлива от ранее образовавшихся отложений.

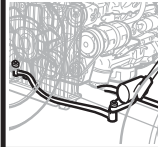

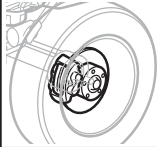

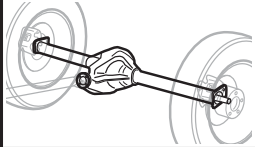

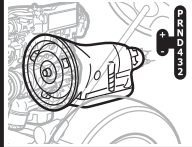

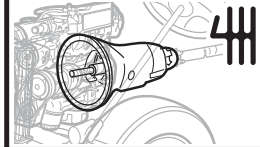

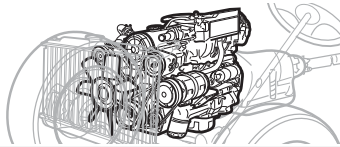

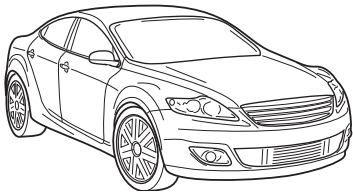

### TDA

Комплексная многофункциональная присадка к дизельному топливу. Используется для улучшения прокачиваемости дизельного топлива, особенно при работе в зимнее время года. Благодаря его особым свойствам может применяться круглый год. Перед очередной заправкой топлива залить Castrol TDA в топливный бак в соотношении 1:1000.

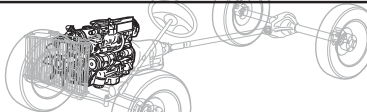

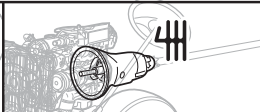

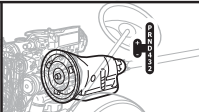

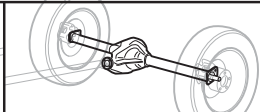

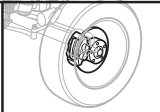

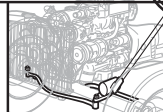

#### Особые свойства:

- не оказывает существенного влияния на вязкость и плотность топлива, т.е. заданные на заводе параметры остаются неизменными;
- работа топливной аппаратуры осуществляется в штатных, рассчитанных режимах;
- обладает мощной депрессорной способностью, т.е. находясь в рекомендованном количестве в топливе, значительно улучшает его низкотемпературные свойства;
- прекрасно защищает топливо от окисления, стабилизирует и делает возможным его длительное хранение;
- является ингибитором коррозии;
- высокие противоизносные характеристики полностью компенсируют недостаток смазывающих свойств стандартного топлива;
- хорошо выражено моющее действие, смывает ранее образовавшиеся отложения и не позволяет образовываться новым.
