| <b>3FE</b> | Set, besteht aus 3 Filterelementen                                |
| <b>3PO</b> | Anschluss 3 polig                                                 |
| <b>3T5</b> | Für Fahrzeuge mit 3,5 t zulässigem Gesamtgewicht                  |
| <b>4BA</b> | 4 bar                                                             |
| <b>4T5</b> | Für Fahrzeuge mit 4,5 t zulässigem Gesamtgewicht                  |
| <b>5PO</b> | Anschluss 5 polig                                                 |
| <b>6BA</b> | 6,4 bar                                                           |
| <b>ABM</b> | Abmessungen beachten                                              |
| <b>ABS</b> | Für Fahrzeuge mit ABS                                             |
| <b>ABS</b> | Für Fahrzeuge ohne ABS                                            |
| <b>AFP</b> | Am Fahrerplatz eingebaut                                          |
| <b>AG</b>  | Für Fahrzeuge mit automatischem Getriebe                          |
| <b>AG8</b> | Für Fahrzeuge mit automatischem Getriebe, 8 Gänge                 |
| <b>AGF</b> | Für Fahrzeuge mit Abgasentgiftung                                 |
| <b>AGF</b> | Für Fahrzeuge ohne Abgasentgiftung                                |
| <b>AGH</b> | Für Aluminiumgehäuse                                              |
| <b>AHF</b> | Ansauganlage hinter dem Fahrerhaus                                |
| <b>ALD</b> | Nur für Ölfiltergehäuse mit Aluminiumdeckel                       |
| <b>ANV</b> | Ansauganlage vorn                                                 |
| <b>ASO</b> | Luftansaugung oben                                                |
| <b>ATN</b> | Nicht für Ausführung Trekking                                     |
| <b>ATP</b> | Für Fahrzeuge mit AMG Technik-Paket                               |
| <b>ATP</b> | Für Fahrzeuge ohne AMG Technik-Paket                              |
| <b>AZ1</b> | Von Bosch entwickelt und gefertigt                                |
| <b>AZY</b> | Ansauganlage und Zyklonfilter hinten hochgezogen                  |
| <b>BHR</b> | Einbaugleiches Bosch-Erzeugnis oder Teil für Behr                 |
| <b>BO</b>  | Bosch, nur als Ersatz für Bosch-Ausrüstung                        |
| <b>CAV</b> | Einbaugleiches Bosch-Erzeugnis oder Teil für CAV                  |
| <b>DE</b>  | Drei erforderlich                                                 |
| <b>DHI</b> | Einbaugleiches Bosch-Erzeugnis oder Teil für Delphi               |
| <b>DIF</b> | Für Differential                                                  |
| <b>DKA</b> | Für Klimaanlage auf dem Dach                                      |
| <b>DKG</b> | Für Fahrzeuge mit Doppelkupplungsgetriebe                         |
| <b>DLU</b> | Druckluftunterstütztes Bremssystem                                |
| <b>DOH</b> | Zwei obenliegende Nockenwellen, DOHC                              |
| <b>DRR</b> | Mit Druckregler                                                   |
| <b>DRR</b> | Ohne Druckregler                                                  |
| <b>DTV</b> | Druckregler am Filter verbaut (Druckregler nicht im Lieferumfang) |
| <b>DTV</b> | Druckregler nicht am Filter verbaut                               |
| <b>E96</b> | Für Abgasnorm EEC 96                                              |
| <b>EAY</b> | Für Fahrzeuge mit Easytronic-Getriebe                             |
| <b>EFV</b> | Auch Ersatz für Vorgänger                                         |
| <b>EHX</b> | Für Fahrzeuge mit ELX-, HLX-Ausstattung                           |
| <b>ELH</b> | Für Fahrzeuge ohne elektrisches Heizungssystem                    |
| <b>ERH</b> | Für Fahrzeuge mit erhöhter Nutzlast                               |
| <b>EU2</b> | Für Fahrzeuge mit Abgasnorm Euro 2                                |
| <b>EU3</b> | Für Fahrzeuge mit Abgasnorm Euro 3                                |
| <b>EU3</b> | Nicht für Fahrzeuge mit Abgasnorm Euro 3                          |
| <b>EU4</b> | Für Fahrzeuge mit Abgasnorm Euro 4                                |
| <b>EU4</b> | Nicht für Fahrzeuge mit Abgasnorm Euro 4                          |
| <b>EU5</b> | Für Fahrzeuge mit Abgasnorm Euro 5                                |
| <b>EU6</b> | Nicht für Fahrzeuge mit Abgasnorm Euro 5                          |

|            |                                                                                                                                  |
|------------|----------------------------------------------------------------------------------------------------------------------------------|
| <b>EU6</b> | Für Fahrzeuge mit Abgasnorm Euro 6                                                                                               |
| <b>EVG</b> | Für Fahrzeuge mit elektronischem Vergaser                                                                                        |
| <b>FBF</b> | Für Baustellenfahrzeuge                                                                                                          |
| <b>FBF</b> | Nicht für Baustellenfahrzeug                                                                                                     |
| <b>FEP</b> | Für Einspritzpumpe                                                                                                               |
| <b>FG</b>  | Für Getriebe                                                                                                                     |
| <b>FHE</b> | Für Heizung                                                                                                                      |
| <b>FIH</b> | Kraftstofffilter beheizt                                                                                                         |
| <b>FIR</b> | Filter rechteckig                                                                                                                |
| <b>FIU</b> | Kraftstofffilter unbeheizt                                                                                                       |
| <b>FIZ</b> | Filter zylindrisch                                                                                                               |
| <b>FKO</b> | Für Kompressor                                                                                                                   |

| <b>MLT</b> | Con separatore d'olio                                                              |
| <b>MMP</b> | Per veicoli con bus dati multiplex                                                 |
| <b>MMP</b> | Per veicoli senza bus dati multiplex                                               |
| <b>MOO</b> | Per veicoli con e senza climatizzatore                                             |
| <b>MOR</b> | Per motore                                                                         |
| <b>MPR</b> | Per veicoli con filtro antiparticolato                                             |
| <b>MPR</b> | Per veicoli senza filtro antiparticolato                                           |
| <b>MPY</b> | Non per veicoli con Micro-guard Puretron                                           |
| <b>MRK</b> | Per veicoli con ritorno carburante                                                 |
| <b>MW1</b> | Con vite scarico acqua filettatura M10                                             |
| <b>MW8</b> | Con vite scarico acqua filettatura M8                                              |
| <b>MWA</b> | Con vite scarico acqua                                                             |
| <b>MXF</b> | Filtro carburante montato fuori dal serbatoio                                      |
| <b>N13</b> | Per norma gas di scarico Euro 96                                                   |
| <b>N25</b> | Per norma gas di scarico Euro 2005, EC 2005                                        |
| <b>N25</b> | Non per norma gas di scarico Euro 2005, EC 2005                                    |
| <b>NAA</b> | Non per trazione integrale                                                         |
| <b>ND</b>  | Prodotto Bosch identico o componente per Denso                                     |

|            |                                                                     |
|------------|---------------------------------------------------------------------|
| <b>NEA</b> | Per presa di forza                                                  |
| <b>NEB</b> | Filtro a portata parziale                                           |
| <b>NFV</b> | Non per veicoli con carburante Flex                                 |
| <b>NGB</b> | Non per veicoli con funzionamento a gas                             |
| <b>NL4</b> | Per norma gas di scarico L4                                         |
| <b>NLT</b> | Senza separatore d'olio                                             |
| <b>NOR</b> | Versione normale                                                    |
| <b>NW4</b> | Per norma gas di scarico W4                                         |
| <b>OBD</b> | Per veicoli con diagnosi On-Board (OBD)                             |
| <b>ØBD</b> | Per veicoli senza diagnosi On-Board (OBD)                           |
| <b>OES</b> | Filtro olio con montaggio sul lato frontale                         |
| <b>OKB</b> | Senza cabina conducente                                             |
| <b>OMZ</b> | Filtro olio con centrifuga                                          |
| <b>ØMZ</b> | Filtro olio senza centrifuga                                        |
| <b>ØRK</b> | Per veicoli senza ritorno carburante                                |
| <b>PFN</b> | Non per impianto frenante BMW Performance                           |
| <b>PGH</b> | Per alloggiamento in plastica                                       |
| <b>PRF</b> | Prodotto o parte Bosch di dimensioni identiche per Purflux          |
| <b>PRI</b> | Circuito primario                                                   |
| <b>RAB</b> | Montaggio a destra                                                  |
| <b>RAP</b> | Non compatibile RME (estere metilico da olio di colza)              |
| <b>REC</b> | Filettatura destrorsa                                               |
| <b>RLE</b> | Per guida a destra                                                  |
| <b>ROB</b> | Resistente all'olio di colza                                        |
| <b>ROD</b> | Prodotto o parte Bosch di dimensioni identiche per Roto-Diesel      |
| <b>RUL</b> | Per tubazione di ritorno carburante                                 |
| <b>SA</b>  | Equipaggiamento speciale                                            |
| <b>SAZ</b> | Serie                                                               |
| <b>SBE</b> | Per forti sollecitazioni                                            |
| <b>SCJ</b> | Per veicoli con catalizzatore SCR (Selective Catalytic Reduction)   |
| <b>SCJ</b> | Per veicoli senza catalizzatore SCR (Selective Catalytic Reduction) |
| <b>SFZ</b> | Per veicoli speciali                                                |
| <b>SHL</b> | Con fascetta stringitubo                                            |
| <b>SIE</b> | Prodotto Bosch equivalente o pezzo per Siemens                      |
| <b>SOH</b> | Un albero a camme in testa, SOHC                                    |
| <b>SSJ</b> | Per veicoli con funzione di avviamento/arresto                      |
| <b>SSJ</b> | Per veicoli senza funzione di avviamento/arresto                    |
| <b>STH</b> | Con riscaldamento autonomo                                          |
| <b>STT</b> | Tipo Standard                                                       |
| <b>STZ</b> | Per zone polverose                                                  |
| <b>STZ</b> | Non per zone polverose                                              |
| <b>SVL</b> | Con chiusura rapida                                                 |
| <b>SWA</b> | Filtro con sensore livello acqua                                    |

|            |                                                                                                                                                                                                                                                                                                       |
|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>SWA</b> | Filtro senza sensore livello acqua                                                                                                                                                                                                                                                                    |
| <b>TAF</b> | Per autocisterne                                                                                                                                                                                                                                                                                      |
| <b>TEN</b> | Prodotto Bosch identico o componente per Tennex                                                                                                                                                                                                                                                       |
| <b>THD</b> | Dopo il montaggio la centralina integrata deve essere programmata in un'officina autorizzata del costruttore del veicolo.                                                                                                                                                                             |
| <b>TMV</b> | Filtro aria a secco con preseparatoro                                                                                                                                                                                                                                                                 |
| <b>TMV</b> | Filtro aria a secco senza preseparatoro                                                                                                                                                                                                                                                               |
| <b>TNK</b> | Per un'identificazione sicura del numero Bosch deve essere disponibile la scheda dati del veicolo. I componenti riportati sul prodotto devono coincidere con quelli nella scheda dati.                                                                                                                |
| <b>TOR</b> | Prodotto Bosch identico o componente per Toyo Roki                                                                                                                                                                                                                                                    |

| <b>2FE</b> | Un juego esta integrado por 2 elementos filtradores                                                      |
| <b>303</b> | Diámetro de 303 mm                                                                                       |
| <b>327</b> | Longitud: 327 mm                                                                                         |
| <b>35N</b> | Longitud: 350 mm                                                                                         |
| <b>3BA</b> | 3 bar                                                                                                    |
| <b>3FE</b> | Un juego esta integrado por 3 elementos filtradores                                                      |
| <b>3PO</b> | Conexión de 3 polos                                                                                      |
| <b>3T5</b> | Para vehículos con un peso total admisible de 3,5 t                                                      |
| <b>4BA</b> | 4 bar                                                                                                    |
| <b>4T5</b> | Para vehículos con un peso total admisible de 4,5 t                                                      |
| <b>5PO</b> | Conexión de 5 polos                                                                                      |
| <b>6BA</b> | 6,4 bar                                                                                                  |
| <b>ABM</b> | Observar las medidas                                                                                     |
| <b>ABS</b> | Para vehículos con ABS                                                                                   |
| <b>ABS</b> | Para vehículos sin ABS                                                                                   |
| <b>AFP</b> | Montada en el lugar del conductor                                                                        |
| <b>AG</b>  | Para vehículos con cambio automático                                                                     |
| <b>AG8</b> | Para vehículos con cambio automático, 8 marchas                                                          |
| <b>AGF</b> | Para vehículos con desintoxicación de gases de escape                                                    |
| <b>AGF</b> | Para vehículos sin desintoxicación de gases de escape                                                    |
| <b>AGH</b> | Para carcasa de aluminio                                                                                 |
| <b>AHF</b> | Instalación de aspiración detrás de la cabina del conductor                                              |
| <b>ALD</b> | Sólo para cuerpo de filtro de aceite con tapa de aluminio                                                |
| <b>ANV</b> | Instalación de aspiración delante                                                                        |
| <b>ASO</b> | Aspiración de aire arriba                                                                                |
| <b>ATN</b> | No para la versión Trekking                                                                              |
| <b>ATP</b> | Para vehículos con paquete de técnica AMG                                                                |
| <b>ATP</b> | Para vehículos sin paquete de técnica AMG                                                                |
| <b>AZ1</b> | Desarrollado y producido por Bosch                                                                       |
| <b>AZY</b> | Sistema de aspiración y filtro ciclónico atrás levantado                                                 |
| <b>BHR</b> | Producto Bosch de dimensiones idénticas para BEHR                                                        |
| <b>BO</b>  | Bosch, sólo como producto de substitución para el equipo Bosch                                           |
| <b>CAV</b> | Producto Bosch de dimensiones idénticas para CAV                                                         |
| <b>DE</b>  | Se necesitan tres                                                                                        |
| <b>DHI</b> | Producto Bosch de dimensiones idénticas para Delphi                                                      |
| <b>DIF</b> | Para diferencial                                                                                         |
| <b>DKA</b> | Para aire acondic.en techo                                                                               |
| <b>DKG</b> | Para vehículos con cambio de doble embrague                                                              |
| <b>DLU</b> | Sistema servofreno asistido por aire comprimido                                                          |
| <b>DOH</b> | Dos árboles de levas superiores, DOHC                                                                    |
| <b>DRR</b> | Con regulador de presión                                                                                 |
| <b>DRR</b> | Sin regulador de presión                                                                                 |
| <b>DTV</b> | Regulador de presión montado en el filtro (regulador de presión no incluido en el volumen de suministro) |
| <b>DTV</b> | Regulador de presión no instalado en el filtro                                                           |
| <b>E96</b> | Para norma de gases de escape EEC 96                                                                     |
| <b>EAY</b> | Para vehículos con reductor Easytronic                                                                   |
| <b>EFV</b> | También substitución del anterior                                                                        |
| <b>EHX</b> | Para vehículos con equipamiento ELX, HLX                                                                 |

|            |                                                                   |
|------------|-------------------------------------------------------------------|
| <b>ELH</b> | Para vehículos sin sistema de calefacción eléctrico               |
| <b>ERH</b> | Para vehículos con carga útil elevada                             |
| <b>EU2</b> | Para vehículos con norma de gases de escape EURO 2                |
| <b>EU3</b> | Para vehículos con norma de gases de escape EURO 3                |
| <b>EU3</b> | No para vehículos con norma de gases de escape Euro 3             |
| <b>EU4</b> | Para vehículos con norma de gases de escape EURO 4                |
| <b>EU4</b> | No para vehículos con norma de gases de escape Euro 4             |
| <b>EU5</b> | Para vehículos con norma de gases de escape EURO 5                |
| <b>EU5</b> | No para vehículos con norma de gases de escape Euro 5             |
| <b>EU6</b> | Para vehículos con norma de gases de escape EURO 6                |
| <b>EVG</b> | Para vehículos con carburador electrónico                         |
| <b>FBF</b> | Para vehículos de obras                                           |
| <b>FBF</b> | No para vehículo de obra                                          |
| <b>FEP</b> | Para bomba de inyección                                           |
| <b>FG</b>  | Para caja de cambios                                              |
| <b>FHE</b> | Para calefacción                                                  |
| <b>FIH</b> | Filtro de combustible calefaccionado                              |
| <b>FIR</b> | Filtro rectangular                                                |
| <b>FIU</b> | Filtro de combustible no calefaccionado                           |
| <b>FIZ</b> | Filtro cilíndrico                                                 |
| <b>FKO</b> | Para compresor                                                    |
| <b>FKR</b> | Para vehículos con corta distancia entre ejes                     |
| <b>FL5</b> | Para norma de gases de escape L5                                  |
| <b>FL5</b> | No para norma de gases de escape L5                               |
| <b>FML</b> | Para vehículos sin medidor de masa de aire                        |
| <b>FMV</b> | Para vehículos con filtro previo                                  |
| <b>FMV</b> | Para vehículos sin filtro previo                                  |
| <b>FOE</b> | Para refrigeración de aceite                                      |
| <b>FPJ</b> | Para producción de vehículos Japón                                |
| <b>FRE</b> | Para retardador                                                   |
| <b>FUL</b> | Para aire circulante                                              |
| <b>FUL</b> | Para aire del exterior                                            |
| <b>FUR</b> | Filtro para el habitáculo, acceso a través del espacio reposapiés |
| <b>FVA</b> | Para indicación de ensuciamento del filtro                        |
| <b>FVA</b> | Sin indicación de ensuciamento del filtro                         |
| <b>FW</b>  | Para vehículos de bomberos                                        |
| <b>FWG</b> | Para variador hidráulico                                          |
| <b>GA</b>  | Recto                                                             |
| <b>GS</b>  | Para vehículos con cambio manual                                  |
| <b>H12</b> | Altura de 120 mm                                                  |
| <b>H16</b> | Altura 116 mm                                                     |
| <b>H25</b> | Altura 25 mm                                                      |
| <b>H30</b> | Altura 30 mm                                                      |
| <b>H42</b> | Altura 142 mm                                                     |
| <b>H90</b> | Altura de 90 mm                                                   |
| <b>H96</b> | Altura de 96 mm                                                   |
| <b>HAU</b> | Filtro corriente principal                                        |
| <b>HEI</b> | Con calefacción                                                   |
| <b>HEI</b> | Sin calefacción                                                   |
| <b>HI</b>  | Trasero                                                           |
| <b>HSF</b> | Filtro de polvo, acceso a través de guantera                      |
| <b>HYP</b> | Para bomba hidráulica                                             |
| <b>I27</b> | Diámetro interior abajo 27 mm                                     |
| <b>I36</b> | Diámetro interior abajo 36 mm                                     |
| <b>IF5</b> | Para norma de gases de escape IFL5                                |

|            |                                                                                                                                                                  |
|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>IHI</b> | Con elemento calefactor                                                                                                                                          |
| <b>IIR</b> | Montado en el habitáculo interior                                                                                                                                |
| <b>IMO</b> | Montado en el compartimiento del motor                                                                                                                           |
| <b>ITV</b> | Para vehículos con bomba previa en el depósito                                                                                                                   |
| <b>K96</b> | Para vehículos anteriores al año 2006, el filtro es compatible con el elemento calefactor, longitud de 96 mm (Núm. OE 1904.45). El elemento se puede reutilizar. |
| <b>KL</b>  | Para vehículos con acondicionador de aire                                                                                                                        |
| <b>KLL</b> | Para volante a la izquierda con acondicionador de aire                                                                                                           |
| <b>KL</b>  | Para vehículos sin acondicionador de aire                                                                                                                        |
| <b>KNE</b> | Cartucho de filtro de aire para filtro de aire Knecht                                                                                                            |

Silniki do łodzi

Maszyny rolnicze / budowlane

|                                                                                     |                                           |                                                                                     |                                  |                                                                                       |                                                 |
|-------------------------------------------------------------------------------------|-------------------------------------------|-------------------------------------------------------------------------------------|----------------------------------|---------------------------------------------------------------------------------------|-------------------------------------------------|
|    | Sam. osobowy / mała furgonetka            |    | Pokrywa filtra DENOX             |    | Ilość sztuk w opakowaniu                        |
|    | Silnik stacjonarny / silnik do wbudowania |    | Filtr paliwa                     |    | Objętość w litrach                              |
|    | Informacja / objaśnienie                  |    | Filtr powietrza                  |    | Wyjście                                         |
|    | Opakowanie do sprzedaży samoobsługowej    |    | Filtr oleju                      |    | Wejście                                         |
|    | Opakowanie warsztatowe                    |    | Filtr kabinowy                   |    | Ciśnienie otwarcia zaworu obejściowego          |
|    | Odesłanie do strony                       |    | Element filtrujący               |    | Ciśnienie otwarcia blokady przepływu powrotnego |
|    | Kraj eksportu                             |    | Filtr kabinowy z węglem aktywnym |    | Wysokość                                        |
|   | Typ silnika                               |   | Narzędzie do wyciągania          |   | Średnica                                        |
|  | Zestawienie                               |  | Filtr wstępny                    |  | Przyłącze gwintowane                            |
|  | Typ                                       |  | Element wyrównawczy              |  | Przyłącze węża                                  |
|  | Ilustracja                                |  | Śruba spustowa                   |  | Oddzielanie drobnego pyłu                       |
|  | Data produkcji                            |  | Zestaw uszczelek                 |  | Antyalergeny                                    |
|  | Informacje dodatkowe                      |  | Nr referencyjny                  |  | przeciwbakteryjny                               |
|  | Filtr DENOX                               |  | Opakowanie pojedyncze            |                                                                                       |                                                 |

|            |                                                                           |
|------------|---------------------------------------------------------------------------|
| <b>253</b> | Длина: 253 мм                                                             |
| <b>2FE</b> | Комплект состоит из 2 фильтрующих элементов                               |
| <b>303</b> | Диаметр 303 мм                                                            |
| <b>327</b> | Длина: 327 мм                                                             |
| <b>35N</b> | Длина: 350 мм                                                             |
| <b>3BA</b> | 3 бар                                                                     |
| <b>3FE</b> | Комплект состоит из 3 фильтрующих элементов                               |
| <b>3PO</b> | Разъем, 3-полюсный                                                        |
| <b>3T5</b> | Для автомобилей с допустимой полной массой 3,5 т                          |
| <b>4BA</b> | 4 бар                                                                     |
| <b>4T5</b> | Для автомобилей с допустимой полной массой 4,5 т                          |
| <b>5PO</b> | Соединение 5-пол.                                                         |
| <b>6BA</b> | 6,4 бар                                                                   |
| <b>ABM</b> | соблюдать размеры                                                         |
| <b>ABS</b> | для автомобилей с антиблокировочным устройством                           |
| <b>ABS</b> | для автомобилей без антиблокировочного устройства                         |
| <b>AFP</b> | Встроен на месте водителя                                                 |
| <b>AG</b>  | для автомобилей с автоматической коробкой скоростей                       |
| <b>AG8</b> | Для автомобилей с автоматической коробкой передач, 8 передач              |
| <b>AGF</b> | Для автомобилей со сниженной токсичностью ОГ                              |
| <b>AGF</b> | Не для автомобилей со сниженным уровнем ОГ                                |
| <b>AGH</b> | Для алюминиевого корпуса                                                  |
| <b>AHF</b> | Система впуска за кабиной водителя                                        |
| <b>ALD</b> | только для корпуса масляного фильтра с алюминиевой крышкой                |
| <b>ANV</b> | Система впуска впереди                                                    |
| <b>ASO</b> | Впуск воздуха сверху                                                      |
| <b>ATN</b> | Не для осуществления буксировки                                           |
| <b>ATP</b> | Для автомобилей с техническим пакетом AMG                                 |
| <b>ATP</b> | Для автомобилей без технического пакета AMG                               |
| <b>AZ1</b> | Разработано и изготовлено Bosch                                           |
| <b>AZY</b> | Система впуска и циклонный фильтр, поднятый сзади                         |
| <b>BHR</b> | Монтируемое таким же образом изделие Bosch или деталь для Behr            |
| <b>BO</b>  | Bosch, только в качестве замены оснащения фирмы Bosch                     |
| <b>CAV</b> | взаимозаменяемый продукт фирмы Bosch или деталь для фирмы CAV             |
| <b>DE</b>  | Требуется три                                                             |
| <b>DHI</b> | Монтируемое таким же образом изделие Bosch или деталь для Delphi          |
| <b>DIF</b> | Для дифференциала                                                         |
| <b>DKA</b> | Для кондиционера на крыше                                                 |
| <b>DKG</b> | Для автомобилей с коробкой передач с двухдисковым сцеплением              |
| <b>DLU</b> | Тормозная система с поддержкой сжатого воздуха                            |
| <b>DOH</b> | Два верхних распределительных вала, DOHC                                  |
| <b>DRR</b> | С регулятором давления                                                    |
| <b>DRR</b> | Без регулятора давления                                                   |
| <b>DTV</b> | Регулятор напора встроен в фильтр (Регулятор напора в поставку не входит) |
| <b>DTV</b> | Регулятор давления не на фильтре                                          |
| <b>E96</b> | Для нормы токсичности ОГ ЕЕС 96                                           |
| <b>EAY</b> | Для автомобилей с коробкой передач Easytronic                             |
| <b>EFV</b> | Также замена для предшественника                                          |
| <b>ENX</b> | Для автомобилей с оборудованием ELX, HLX                                  |

|            |                                                         |
|------------|---------------------------------------------------------|
| <b>ENH</b> | Для автомобилей без электрической системы обогрева      |
| <b>ERH</b> | Для автомобилей с повышенной полезной нагрузкой         |
| <b>EU2</b> | Для автомобилей с нормой токсичности ОГ Euro 2          |
| <b>EU3</b> | Для автомобилей с нормой токсичности ОГ Euro 3          |
| <b>EU3</b> | Не для автомобилей с нормой токсичности ОГ Euro 3       |
| <b>EU4</b> | Для автомобилей с нормой токсичности ОГ Euro 4          |
| <b>EU4</b> | Не для а/м с нормами токсичности ОГ Euro 4              |
| <b>EU5</b> | Для автомобилей с нормой токсичности ОГ Euro 5          |
| <b>EU5</b> | Не для автомобилей с нормой токсичности ОГ Euro 5       |
| <b>EU6</b> | Для автомобилей с нормой токсичности ОГ Euro 6          |
| <b>EVG</b> | Для транспортных средств с электронным карбюратором     |
| <b>FBF</b> | Для транспортных средств, используемых на стройке       |
| <b>FBF</b> | Не для автомобиля для строительных работ                |
| <b>FEP</b> | Для впрыскивающего топливного насоса                    |
| <b>FG</b>  | для коробок передач                                     |
| <b>FHE</b> | для отопления                                           |
| <b>FIH</b> | Топливный фильтр с обогревом                            |
| <b>FIR</b> | Прямоугольный фильтр                                    |
| <b>FIU</b> | Топливный фильтр без обогрева                           |
| <b>FIZ</b> | Цилиндрический фильтр                                   |
| <b>FKO</b> | для компрессора                                         |
| <b>FKR</b> | для автомобилей с короткой базой                        |
| <b>FL5</b> | Для нормы токсичности ОГ L5                             |
| <b>FL5</b> | Не для нормы токсичности ОГ L5                          |
| <b>FML</b> | Для автомобилей без датчика массового расхода воздуха   |
| <b>FMV</b> | для автомобилей с фильтром грубой очистки               |
| <b>FMV</b> | для автомобилей без фильтра грубой очистки              |
| <b>FOE</b> | Для масляного охлаждения                                |
| <b>FPJ</b> | Для автомобилей производства Японии                     |
| <b>FRE</b> | Для тормоза-замедлителя                                 |
| <b>FUL</b> | Для циркулирующего воздуха                              |
| <b>FUL</b> | Для приточного воздуха                                  |
| <b>FUR</b> | Салонный фильтр, доступ через пространство для ног      |
| <b>FVA</b> | для фильтров с индикацией загрязнения                   |
| <b>FVA</b> | без указателя загрязнения фильтра                       |
| <b>FW</b>  | для противопожарных автомобилей                         |
| <b>FWG</b> | для привода преобразователя                             |
| <b>GA</b>  | прямо                                                   |
| <b>GS</b>  | для автомобилей с коробкой передач с ручным управлением |
| <b>H12</b> | Высота 120 мм                                           |
| <b>H16</b> | Высота 116 мм                                           |
| <b>H25</b> | Высота 25 мм                                            |
| <b>H30</b> | Высота 30 мм                                            |
| <b>H42</b> | Высота 142 мм                                           |
| <b>H90</b> | Высота 90 мм                                            |
| <b>H96</b> | Высота 96 мм                                            |
| <b>HAU</b> | Фильтр главного потока                                  |
| <b>HEI</b> | с отоплением                                            |
| <b>HEI</b> | Без подогрева                                           |
| <b>HI</b>  | сзади                                                   |
| <b>HSF</b> | Пылевой фильтр, доступ через вещевой ящик               |

|            |                                                                                                                                                                    |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>HYP</b> | для гидронасоса                                                                                                                                                    |
| <b>I27</b> | Внутренний диаметр менее 27 мм                                                                                                                                     |
| <b>I36</b> | Внутренний диаметр менее 36 мм                                                                                                                                     |
| <b>IF5</b> | Для нормы токсичности ОГ IFL5                                                                                                                                      |
| <b>INI</b> | С нагревательным элементом                                                                                                                                         |
| <b>IIR</b> | Установлено в салоне                                                                                                                                               |
